## **QUICK START GUIDE**

Welcome to CITYPLAY powered by Playermaker! Follow the instructions in this guide to learn how to charge your sensors, conduct an activity, sync your data onto the app and more!

# 1 CHARGING SENSORS AND LIGHTS STATUS

- Charging sensors and lights status
- Use the provided cable to charge your sensors before every activity
- Charge your sensors by plugging the charging cable into the bottom of the case and into a power outlet
- When your sensors are charging, status lights will shine and display the relevant battery state

## Green lights

Fully charged

## Orange lights

Low level battery - You have up to two hours of recording time

## Red lights

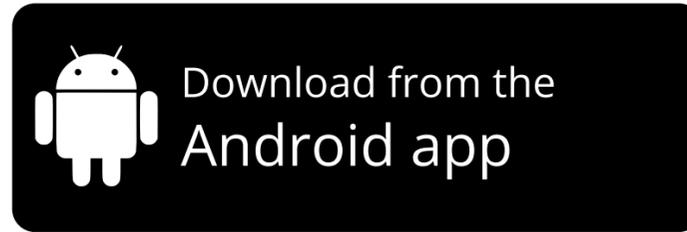

Cannot start an activity - Sensors require charging

When you're sensors are not charging, status lights will shut off and your sensors will go into rest mode  
Check your sensors' battery level by opening the app with your phone nearby

**Important:** The case charges the sensors on its own only when connected to a power outlet.

## 2 SIGN UP

- Download the , “**CITY.PLAY**” app from

- Create your profile. (QR to sign up article)
- Activate your membership.
- Pair your sensors

### 3 STRAP UP AND HIT THE PITCH!

- Start your session by removing your sensors from the case.
- Your sensor lights will blink blue indicating your session is actively being recorded.
- Insert your sensors into the straps and place the straps on your shoes boots
- **Start playing!**

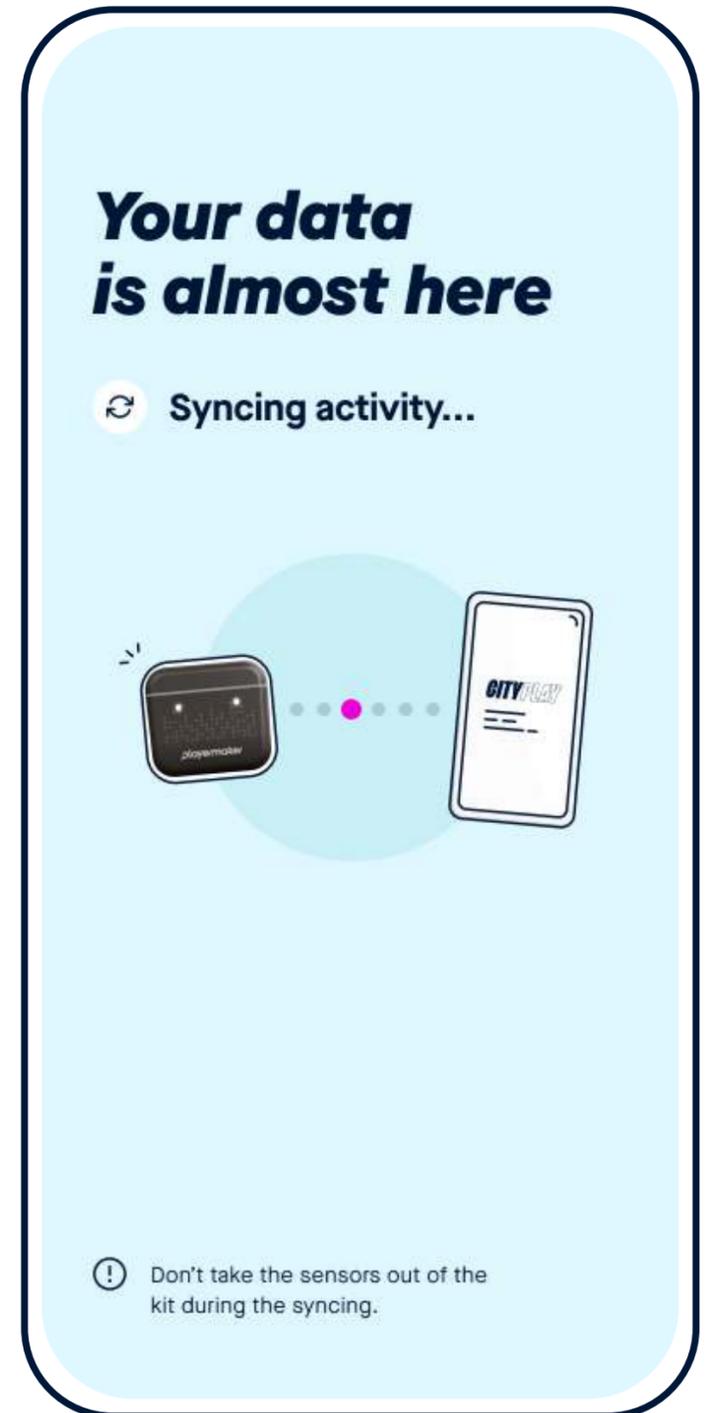

# 4 SCAN THE QR CODE TO LEARN HOW TO STRAP THE SENSORS CORRECTLY

- End the session and sync the data with the app

End your session by placing the sensors back inside the case. Your sensor lights will blink white indicating your data is ready to be synced onto your phone.

- To sync your data, make sure bluetooth is on and your sensors are nearby. Open the app and follow the on-screen instructions to explore your performance

**Important:** Keep your sensors inside their case when you are not recording an activity
